Assembly instructions

ref: 2002 standard hardware

This crib has been designed for your child's comfort and your convenience. Quality material and workmanship have gone into this crib which will provide a sound and comfortable bed for your baby if properly assembled and maintained. For the security of your child and your own peace of mind be sure to follow the assembly instructions exactly. A periodic check should be made of all bolts and screws, which should be tightened if needed. Moisture and heat are harmful to the finish; for this reason use extreme caution when a vaporizer is in use. The vapor steam should always be aimed away from the crib as well as away from any other wood furniture. Some types of soft plastic toys could damage the finish when placed against it.

Crib and drawer parts list 2 rails (P) 1 drawer back (Q) 1 drawer front (R) 1 drawer center partition (S) 2 drawer ends (T) 2 drawer bottoms (U) 2 ends (X) 2 dropsides (Y) 1 spring (Z)			Tools needed for assembly 	INSTRUCTION LEAFLET Important, keep for future reference. Read carefully 			
IMPORTANT: In order to properly assemble the cot, carry out the operations in the order specified. Failure to assemble the crib in the manner recommended could make the crib hazardous. Carefully remove and lay out all parts. Familiarize yourself with all diagrams to facilitate the assembly of your crib. Check parts enclosed in hardware bag with the HARDWARE PARTS LIST to be sure all are included and quantities are correct.							

1

Applying the metal tracks (F) to the ends (X)

When installing tracks to head & foot boards (Diagram 1) track stamped "R" must be placed on right side, track stamped "L" must be placed on left side. Make sure the small wheel located on the track is closest to the front of the crib, this will determine which side the drawer will enter and will establish drop side. Be very careful to the correct positioning: the track must ALWAYS be positioned with the small wheel towards the drawer front and downwards. Fix the tracks using the 4 screws N.

2

Casters

Place casters and inserts (K) in bottom of each leg as shown in Diagram 2, then very carefully place crib upright.

IMPORTANT: Don't strike the wheels! Place a piece of wood or something similar that will fit between the wheels, and gently tap with a hammer.

Diagram 2

3a**Assembling crib and positioning of spring**

HEADBOARD/FOOTBOARD (ENDS) ATTACHMENT TO SPRING FRAME. You will now attach headboard/footboard (ends) (D) to the rails. Place a curved fastener plate (Q) into the large holes on inside of the rails (J) (refer to Diagrams 3 and 4 for placement). Insert each allenhead bolt (long) (H) into holes located in both ends (D), and into hole in end of rails (J) until seated in threads of holes in curved fastener plates (Q).

3b**Assembling spring (Z) to rails (P)**

Align hole in each support arm of the spring (Z) with the hole on the rail (P). Secure with allenhead bolt and nut (B) using allen wrench to tighten. Repeat procedure with the three remaining holes.

Positioning height of mattress

You may select the mattress height: there are three spring (G) positions from which to choose: **UPPER POSITION.** **MIDDLE POSITION** - note middle position holes located toward center of spring frame. **LOW POSITION** - remove screws (V) and wing nuts (W) from support arms, collapse spring frame (G) to rest on rails (J). **WHEN PLACED IN THE LOW POSITION BE SURE SUPPORT ARMS ARE FULLY LOWERED SO AS NOT TO PUNCTURE MATTRESS.**

4 Drawer assembly

When assembling drawers with roller glides, assemble the sides of the drawer so the small wheels are toward the back of the drawer. The wheels drop into the openings in the rail mounted at the inside of the headboard and footboard. Attach the drawer ends and the center partition to the drawer back as shown on Diagram 6; slide the bottom panels, making them run in the grooves, and when the insertion is complete, attach the front panel and tighten the fastenings.

Diagram 6

5 Covering the holes of the dropside

The couple of screws A has the only function to cover the holes of the dropside.

6a

Applying the dropside

7

Applying the stationary side

At least one of the two sides **MUST BE FIXED** for the stability of the bed.

!WARNING!

FAILURE TO FOLLOW THESE WARNINGS AND ASSEMBLY INSTRUCTIONS COULD RESULT IN SERIOUS INJURY OR DEATH.

KEEP THESE INSTRUCTIONS FOR FUTURE USE.

BEFORE each assembly inspect crib for damaged hardware, loose joints, missing parts or sharp edges. Upon completion of assembly be sure all screws, bolts and fastening devices have been tightened securely. A frequent check should be made during the use of the crib to make sure all parts remain tight and secure.

DO NOT use any crib if any parts are missing or broken.

DO NOT substitute parts!

Do not place crib near window where cords from blinds or drapes may strangle a child.

DO NOT use a waterbed mattress.

Do Not leave child in crib with the side lowered. Be sure side is in raised and locked position whenever child is in crib.

Do Not tie pacifiers, necklaces or any other items around a child's neck or on crib parts. THIS COULD CAUSE STRANGULATION!

WHEN CHILD IS ABLE TO PULL INTO A STANDING POSITION lower the mattress to the lowest position. Remove all bumper pads, large toys and other objects that could serve as steps for climbing out. When child is able to climb out or reaches the height of 35 inches, the crib must no longer be used. The child should then be transferred to a youth or regular bed.

If refinishing the crib, use only a non-toxic finish specified for children's products.

Never use plastic shopping bags or other plastic film as a mattress protector because they can cause suffocation.

**ANY MATTRESS USED IN THIS CRIB
MUST BE AT LEAST 27 1/4", BY 51 5/8"
WITH A THICKNESS NOT EXCEEDING 6".**

(The dimensions shall be taken seam-to-seam or edge-to-edge where appropriate.)

This crib conforms to the applicable regulations of the Consumer Product Safety Commission.
